Agricultural Statistics

PEANUTS

Featuring County Estimates, 1925-1959

JANUARY - 1961

FOREWORD

This publication, which is devoted entirely to peanuts, is the third in a series to be issued for each major crop produced in North Carolina. It has been prepared in response to a sharp increase in the number of requests for historical information on crop acreages and production at the county level.

County estimates on the acreage, yield, production, price and value of peanuts from 1925 through 1959 are shown on pages 6 through 19. Statistics at the State level on the acreage, yield, production, price and value of peanuts start with 1909 and are shown on page 3.

The publication of these data is made possible through a special project whereby State funds are matched with Federal funds received from the Agricultural Marketing Service, U.S.D.A., under provisions of the Agricultural Marketing Act of 1946.

PRODUCTION OF PEANUTS IN NORTH CAROLINA

Production of peanuts in the United States is confined primarily to three areas, i.e., Virginia-North Carolina, Southeast (principally Georgia and Alabama), and Southwest (principally Oklahoma and Texas--see page 5). About one-third of the production of peanuts in the United States usually comes from the Virginia-Carolina area from about one-fifth of the total acreage in the United States. About three-fifths of the total production in the Virginia-Carolina area comes from North Carolina from about two-thirds of the total acreage in this area. Usually North Carolina accounts for about 18 percent of the total United States production of peanuts (see page 5). Among the states, North Carolina ranks second to Georgia in the production of peanuts.

Peanut production in the Virginia-Carolina area is concentrated in southeastern Virginia and northeastern North Carolina. Most of the crop in

the Virginia-Carolina area comes from the large-seeded Virginia-type varieties.

Since records were started in 1909, the North Carolina picked and threshed peanut acreage ranged from a low of 126,000 acres in 1919 and 1920 to a high of 320,000 acres in 1945. The acreage exceeded 200,000 for the first time in 1927 when 210,000 acres were harvested (see chart, page 3). From 1928 to 1942 the acreage fluctuated rather sharply during some years, ranging from a low of 190,000 acres in 1933 to a high of 270,000 acres in 1942. The picked and threshed acreage reached the 300,000 acre mark for the first time in 1943. Following the record high 320,000 acres harvested in 1945, the acreage declined to 227,000 acres in 1950 and to 178,000 in 1958.

The average yield per acre of peanuts in North Carolina exceeded 950 pounds for the first time in 1918 with an average of 1,025 pounds.

PRODUCTION OF PEANUTS (Cont'd.)

The average yield per acre increased to 1,325 pounds in 1937 and to 1,430 pounds in 1940. From 1941 through 1950 the average yield per acre ranged from a high of 1,255 pounds in 1942 to a low of 925 pounds in 1946. The average yield per acre trended upward from 1951 to 1958, when the record high of 1,860 pounds was realized. The 1959 average was down to 1,580 pounds, which was followed by 1,750 pounds in 1960.

The record high production of peanuts in North Carolina was realized in 1940 when 367,510,000 pounds were produced (see chart, page 4). The 1940 record crop was produced on 257,000 acres for an average yield per acre of 1,430 pounds. Production during recent years has ranged from the low 1955 hurricane damaged crop of 201 million pounds to the 1956 crop of 351 million pounds. Production during three of the four years since 1956 has exceeded 300 million pounds.

As pointed out above, the production of peanuts in each of the major states is concentrated within a relatively small area of these states. In North Carolina more than four-fifths of the picked and threshed acreage is grown in 10 counties. Although some shift occurred in the numerical rank of acres harvested, nine of the 10 leading counties in 1945 were among the 10 leading counties in 1959. The 10 leading counties in acres of peanuts picked and threshed in 1945 and 1959 are listed in the table below:

10 LEADING COUNTIES, 1945		10 LEADING COUNTIES, 1959	
County	Acres	County	Acres
Halifax	45,330	Northampton	30,600
Northampton	44,600	Halifax	27,700
Bertie	39,860	Bertie	23,600
Edgecombe	30,340	Edgecombe	16,300
Martin	27,500	Martin	15,800
Hertford	25,100	Hertford	15,700
Pitt	16,530	Gates	7,700
Gates	13,720	Pitt	6,900
Chowan	12,990	Chowan	6,350
Perquimans	11,500	Bladen	5,300

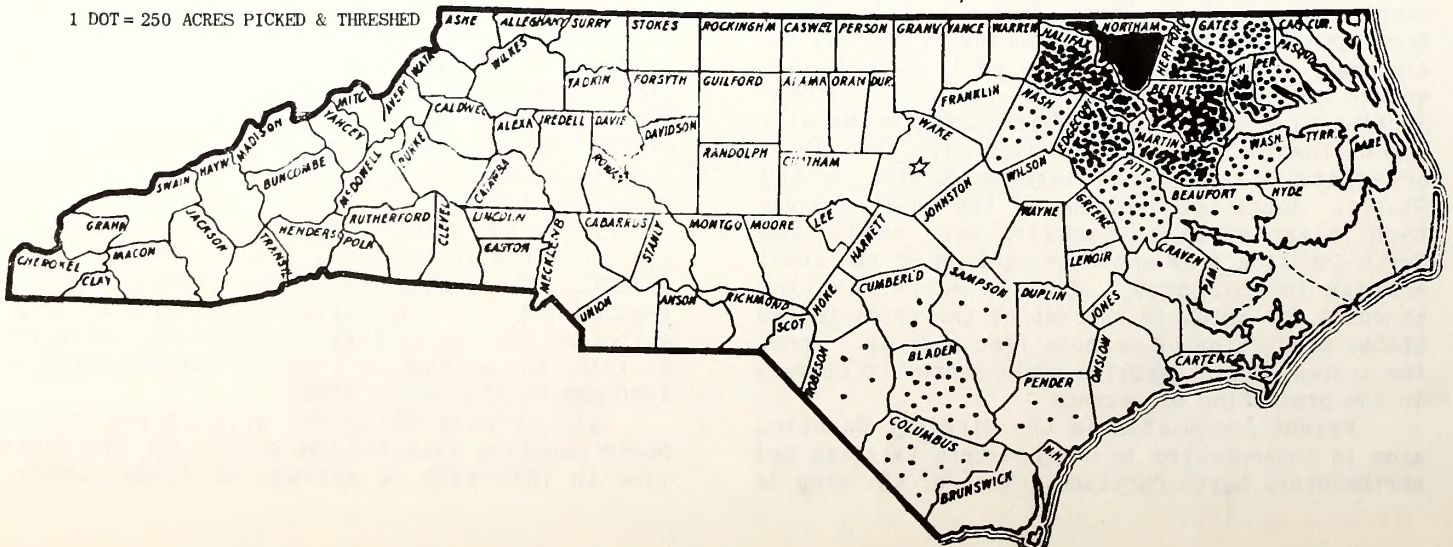

Statewide, cash receipts from sales of peanuts constitute a relatively small portion of the total cash receipts from marketings of all crops and livestock (see table below). Cash receipts from sales of peanuts in counties such as Northampton, Gates, Chowan, Hertford, Halifax, and Bertie account for a major portion of the total cash receipts from sales of both crops and livestock.

Total Cash Receipts From Farm Marketings, And Percent Of Total Cash Receipts From Peanuts, 1925-1959, North Carolina

Year	Total Cash Receipts From Farm Marketings Of Crops, Livestock And Products	Cash Receipts From Peanuts	Cash Receipts From Peanuts As Percent Of Total Cash Receipts From All Commodities
